

# POOLRx™

- 
**REDUCES CHEMICALS**
- 
**ELIMINATES ALL ALGAE**
- 
**NO INSTALLATION**
- 
**IDEAL FOR SALT POOLS**

## Amazing Formula

PoolRx contains a proprietary blend of minerals that continuously and effectively eliminate algae for up to 6 months. The specially treated alloy cylinder is packed with minerals that dissolve immediately to form a stable residual in the water. The minerals eliminate algae while freeing up low levels of chlorine to be more productive in the water. During the filtration process the minerals are rejuvenated as they return and pass through the cylinder. PoolRx works synergistically with a constant low level of chlorine. (0.5-1.0 ppm) for residential and (1.0-5.0ppm) for commercial.

### IDEAL FOR SALT POOLS

PoolRx improves the salt water experience. The minerals reduce the salt chlorine production needed to keep your salt pool sanitized and algae free. Less salt chlorine production extends the life of the salt cell and reduces the amount of acid needed to balance the pH. PoolRx prolongs the life of your equipment, saves you money and improves the quality of your water.

### CHELATED MINERALS

PoolRx use a patented chelating method to molecularly bond the minerals and protect them from falling out of solution due to fluctuations in pH.

## The best kept secret for a sparkling clear pool!

PoolRx is the only eco-friendly solution that simplifies pool care, dramatically reduces chemical usage and lowers your overall cost of maintenance.

### FAQs

**Q:** If I have a green pool do I need to clean it first?

**A:** No. PoolRx is the most effective algaecide on the market. It will eliminate all types of algae. Just add the minerals and maintain a low chlorine residual.

**Q:** How long does PoolRx last?

**A:** The PoolRx alloy cylinder unit lasts for one year. Minerals must be refreshed after 6 months for year-round pools.

### TESTIMONIALS

*"Thank you for such an amazing product!!! – It exceeded all your claims and our expectations. I've never had an algae-free season until now, even when I accidentally let my chlorine level dip below 0.5ppm. My only regret is all those years we've had the pool, and didn't have PoolRx."*

- Juliet, Los Angeles, CA

*"I added PoolRx in my swamp and wow! I can't believe that in 24 hours it was crystal clear."*

- Mary, St. Louis, MO

# Simplifies Pool Care

Ideal for  
salt  
pools

## Simple

Place unit in pump basket or skimmer. Minerals go to work immediately

## Regular Pools

- Crystal clear water with less chemicals and less maintenance
- Reduces chlorine levels 0.5 to 1.0 ppm

## Effective

Improving your salt or regular pool swimming experience

## Salt Pools

- Allows you to reduce chlorine production by  $\pm 50\%$
- PoolRx will descale the salt cell, prolonging the life of the cell

## Guaranteed

Eliminates all types of algae and last up to 6 months

## Green to Clear

- A total green pool to clear in 1/2 the regular time
- Less harsh chemicals
